COFFEE CORPORATION

Haiti Coffe Corporation

For over forty years, our company has been operating in Italy in the industrial production of high quality roasted coffee for the Ho.Re.Ca. market (Hotels, Restaurants, Cafeterias and Bars). Through a combination of skilled craftsmanship and ultra-modern technology we ensure a consistently high quality product whilst respecting the environment. All of our activities, from selecting the raw materials to manufacturing and packaging our products, is geared towards customer satisfaction. This is achieved through a continual process of listening to our customers and adapting our practices to current market trends. It is this that gives our coffee blends such a unique and intense flavour. In fact, our experience in this area, coupled with a passion for making delicious coffee, are what make our company stand out. These aspects are recognised by all our commercial partners and can be tasted in every single cup of Haiti Torrefazione espresso coffee.

Blends

The coffee blends that we produce at Haiti Torrefazione come from careful selection of the raw materials used in the production processes. We use different varieties of the highest quality green coffee beans only from carefully selected crops all over the world. A slow-cycle production process ensures that the coffee beans are roasted gradually and evenly, thereby preserving their natural properties and authentic flavour. A strong aroma, creamy texture and rich taste are the three main ingredients of our blends - the result of traditional, sophisticated recipes formulated to meet all the different demands of the espresso coffee market in Italy.

Assistance

Haiti Torrefazione provides technical assistance and training services for its products, thus guaranteeing maximum quality results for our partners all the way through to the actual serving of the coffee. Thanks to our Haiti Torrefazione kits, those bars and restaurants which have chosen to work with us are equipped with all the necessary tools for distributing our products efficiently..

Customer Care

Our employees, from managers to warehouse staff, have for many years been accustomed to behaving and thinking in terms of customer satisfaction and customer relationships, ever aware of the importance of maintaining a two-way communication process which gives added value and competitiveness to Haiti Torrefazione's products. Our clients have shown enormous loyalty to us over the years, as they realise that a commitment to listen to their needs, the highly personalised service they receive from us, plus our highly competitive prices, are the secrets of our success. Choosing Haiti Torrefazione means choosing a dedicated and competitive partner with whom to build a reliable, long-term commercial relationship.
